HEREDITARY DISEASES AND FAMILY HEALTH

Researchers at the Clinic of Vascular Innovations have long worked on solving problems with genetic diseases.

Genetic pathology without treatment tends to deteriorate with each generation, which leads to degeneration.

Our Clinic successfully copes with such hereditary diseases:

- diabetes;
- stroke;
- hypertension;
- obesity;
- oncological diseases;
- autism;
- oligophrenia;
- phenylketonuria;
- Down syndrome;
- and other genetic diseases of the nervous system.

The Clinic of Vascular Innovations is an opportunity to have healthy children, to help cope with severe genetic problems and to have a happy healthy family!
