Medical Reference issued to SLOYAN ICHRAN

Patient data: SLOYAN ICHRAN (passport - AT0579418)

Accompanying person details: SLOYAN ISHKHAN (passport - AN0536254)

After an integrated multidisciplinary check-up, the following diagnosis has been made: Personality development disorder of the autism spectrum. Delay of psychospeech development in the form of sensory-motor alalia, psycho-emotional development and cognitive deficit, hyperdynamic syndrome. Post-Covid vascular syndrome with severe microcirculation deficiency, progressive course in the form of the microthromboangiopathy combination and capillary hemorrhages, hemodynamic patterns of cardiovascular insufficiency and blood supply deficiency in the main arteries.

A 20-day course of intensive angiotherapy and psycho- and neuroprotective therapy has been conducted with personalized programs of daily correction of hemodynamic and neurodynamic parameters, arterial pressure and arterio-venous balance with a combination of vascular, nootropic, rheological, anxiolytic, cardio and angioprotective (actovegin, ginkgo biloba, mexiprim, metamax, L-lysine, neuroxon on a vascular corrective base).

Within 1.5 month in the outpatient mode it is assigned:
to continue taking individually selected drug angiocorrective mixtures in syringes for permanent correction of angiotonus and neurodynamic imbalances and aimed at reducing myocardial ischemia by the author's technologies of personalized angiocorrection on an evidence basis. Take 2 ml of the mixture intramuscularly. Store in the refrigerator. For transportation of medicinal mixtures by any means of transport the storage conditions are the following: refrigerator or in a refrigerated bag with ice cartridges. Containers of the drug mixtures - in syringes. Do not change containers during transportation and further use in order to avoid oxidation and any chemical reactions, which may lead to spoilage of drug mixtures. The following drugs are added to the drug mixtures: wormwood tincture, echinacea extract, decaris 1 pack.
