Ex. № 12/19
on 04.08.2023

Medical Reference given to: Korotun Olena

After the check-up at the clinic, she received a prescription for the treatment of the existing disease.

Diagnosis: cerebral dyshemia on the background of cerebral angiodystonia with expressed long-term spasm of the siphon of the internal carotid artery on the right side with a clinical picture of local cephalgia in the right temporal area, asthenoneurotic disorder and dyssomnia.

It is recommended to take individually selected angiotherapeutic mixtures for the purpose of prevention of blood vessel rupture for 1 month in outpatient mode in syringes for permanent correction of angiotonus and neurodynamic imbalances and aimed at reducing ischemia of the myocardium according to the author's evidence-based personalized angiocorrection technologies.

Take 2 ml of medicinal mixture intramuscularly. Be sure to store in the refrigerator. Storage conditions during transportation of medicinal mixtures by any means of transport: refrigerator or in a refrigerator bag with ice cartridges. The container of medicinal mixtures is in syringes. Do not change the container during transportation and further use in order to avoid oxidation and chemical reaction, which will lead to the deterioration of medicinal mixtures.
