Medical Reference given to: Stashuk Mariia

After the clinical examination at the clinic, she received a prescription for the treatment of the existing disease.

Diagnosis: angiodystonia of cerebral and regional limbic vessels with a clinical picture of Raynaud's syndrome and angiotrophoneurosis of the fingers of hand cysts, complicated by post-Covid microthromboangiopathy, astheno-phobic pattern of neurodynamic and cardiodynamic disorders.

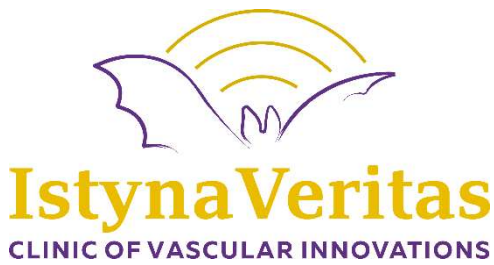

It is recommended to take individually selected angiotherapeutic mixtures in order to continue treatment in an outpatient setting for an optimal sanogenic effect

Medicinal mixtures: 1 syringe of 20 ml for oral use, 18 syringes of 1 ml for morning use intramuscular according to the agreed schedule, 12 syringes of 2 ml for use intramuscular in the evening. Be sure to store in the refrigerator. The storage conditions for the transportation of medicinal mixtures by any means of transport are: refrigerator or in a refrigerator bag with ice cartridges. The container of medicinal mixtures is in syringes. Do not change the container during transportation and further use in order to avoid oxidation and chemical reaction, which will lead to the deterioration of medicinal mixtures.
